GEORPLAST
MADE IN ITALY

Georplast was founded in 1970 in Mezzago, near Milan (Italy).

During the first years it was specialized in injection machinery for third party. In the following years, Georplast decided to create and develop a range of own products: **HOUSEHOLD ITEMS IN DURABLE PLASTIC**.

The internal production management brings the Company to a fast growth in few years and to start the distribution not only in Italy, but also on an international market.

Georplast became the reference point for the market: many national and international customers choose it as main supplier thanks to the production **made in Italy**, to **flexibility** and **possibility of customization**.

The development of its own catalogue brings Georplast to invest in technologies: in 2000 the Company creates an internal mechanical workshop, which allows the creation and maintenance of the moulds.

It's an important choice: Georplast is able to create in short time a very wide and complete range, continuously in expansion.

Thanks to the technological innovation and possibility of internal development, Georplast is ready to take a step forward.

It decides to invest in a new and prominent market: **ACCESSORIES IN PLASTIC FOR ANIMALS**.

It's a winning bet: Georplast opens its doors to worldwide markets and becomes a **LEADER** in the production of pets items.

In few years the catalogue becomes bigger and bigger till to offer a **COMPLETE AND EXCLUSIVE RANGE** of articles for **PET market**.

Every year Georplast creates new products with a very distinctive Italian design, which enriches the range and offers always new solutions for the need of four-legged friends.

Durable and recyclable plastic: allows the re-use and it's not thrown away after the use. Maximum respect for the environment.

Special designers for MADE IN ITALY: Italian products with a unique and functional design. Always recognizable.

Internal management and production : this allows the best customization of the products in order to satisfy all the customers' needs.

Wide stock of each reference in the catalogue, with reduction of waiting time for the customers and possibility to satisfy last minute requests or stock-out.

Why are nylon chew toys beneficial for dogs?

1. Dental and gum health

Chewing helps remove plaque and tartar, keeping teeth and gums healthy.

2. Satisfying natural instincts

Dogs have an innate need to chew; giving them appropriate toys helps prevent destructive behavior.

3. Stress and anxiety relief

Chewing has a calming effect, helping dogs relax and manage anxiety.

4. Mental stimulation

Chewing keeps dogs busy, prevents boredom, and supports mental well-being.

5. Durability and safety

Nylon toys are tough and long-lasting, ideal for dogs who chew vigorously.
